

Listing and Amendments to the Claims

This listing of claims will replace the claims that were published in the PCT Application:

1. (currently amended) ~~User interface for a device~~ Device for playback of multimedia files, including means for changing the sorting order and/or the playback order of a plurality of multimedia files, ~~characterized in that wherein~~ upon changing the sorting order and/or the playback order of the multimedia files the currently selected multimedia file is kept and the new sorting order and/or playback order is determined by at least one property of the currently selected audio file, and wherein the means for changing the sorting order and/or the playback order include a button for changing the order by running through a predefined sequence of properties of the currently selected multimedia file.
2. (currently amended) ~~User interface~~ Device according to claim 1, further including means ~~(2,3)~~ for giving a feedback of the sorting order and/or the playback order.
3. (currently amended) ~~User interface~~ Device according to claim 2, wherein the means ~~(2,3)~~ for giving a feedback of the sorting order and/or the playback order give an acoustical feedback.
4. ~~User interface~~ Device according to claim 2, wherein the means ~~(2,3)~~ for giving a feedback of the sorting order and/or the playback order give an optical feedback.
5. (currently amended) ~~User interface~~ Device according to claim 4, wherein the means ~~(2,3)~~ for giving a feedback of the sorting order and/or the playback order include a display ~~(2,3)~~.

6. (currently amended) ~~User interface~~ Device according to claim 5, wherein the display ~~(2, 3)~~ displays information about at least one multimedia file of the plurality of multimedia files.
7. (currently amended) ~~User interface~~ Device according to claim 5, wherein the display ~~(2, 3)~~ displays information about at least two multimedia files of the plurality of multimedia files, and wherein means ~~(6)~~ are provided for marking a currently selected multimedia file.

Claims 8 - 17 are cancelled.

18. (new) Device according to claim 1, wherein the means for changing the sorting order and/or the playback order include two buttons for changing the order by running in opposite directions through a predefined sequence of properties of the currently selected multimedia file.
19. (new) Device according to claim 1, wherein the means for changing the sorting order and/or the playback order include a specific button for each property of the currently selected multimedia file which is used for determining the sorting order and/or the playback order.
20. (new) Device according to one of claim 1, wherein the means for changing the sorting order and the means for changing the playback order are the same.
21. (new) Device according to claim 1, wherein the properties of the multimedia files used for determining the sorting order and/or the playback order are user-definable.
22. (new) Device according to claim 1, wherein the properties of the multimedia files used for determining the sorting order and/or the playback order are included in the multimedia files.

23. (new) Device according to claim 1, wherein the properties of the multimedia files used for determining the sorting order and/or the playback order are stored in the device for playback of multimedia files.
24. (new) Device according to claim 1, wherein the properties of the audio files used for determining the order include at least one of artist, album, genre, release year, number of accesses, last access, creation date, length, and weighting.
